

**Air pollution can not only eat many precious years of our life, but also leave us in a sick state**

The level of PM 2.5 in indoor air has been observed up-to 250-600 against required levels of ≤60. We can demonstrate this

Capacity of lungs reflects in oxygen transfer to blood, which also defines our age. Choked lungs reduce our life

HEAVENAIR cleans the air and generates negative ions to absorb + ions considerably to make us feel better

**AIR KILLS**

*Estimated health impacts of air pollution in Delhi*

- Premature mortality: **7,350 to 16,200**
- Chronic bronchitis in adults: **53,500**
- Acute bronchitis in children: **391,000**
- Cardiac hospital admissions: **6,700**
- Asthma attacks: **6 million**
- Days with restricted activity: **51 million**
- Days with respiratory symptoms: **244 million**

*Delhi is among top polluted city in the world.* All Indian cities, except Coimbatore and Cochin, have been declared unfit to breathe air

The positive ions present in the indoor air, generated by bulbs, laptops and many other sources, are in abundance and cause much discomfort. Mostly negative ions are missing in indoor air. We can demonstrate this also. Negative ions are present in abundance at waterfalls, hills and forests

API	0-50	51-100	101-200	201-300	301-500	500+
Air Pollution Level	Good	Moderate	Unhealthy	Very unhealthy	Hazardous	Emergency

**WHAT IS YOUR OPTION?**

**Living in a clean healthy atmosphere or in a polluted atmosphere?**

An average person breathes more than 200 million liters of air @ 12 breathes / minute for a life span of 70 years. You will get scared if you come to know the amount of dust breathed inside and the harm it has created on your lungs.

**We drink 6-8 glasses of clean water but inhale highly polluted air**

**Increase your immunity. Use HEAVENAIR**

**7 Stages Purification**

- ❖ HEAVENAIR—Multi-stage air-purifier
- ❖ Cleans the air much below safe levels
- ❖ Kills bacteria / virus
- ❖ Releases negative ions in abundance
- ❖ Suppresses the odour & fumes/ smoke
- ❖ HEAVENAIR is equipped with 3 speed adjustment, timer, remote control, sleep mode, odour sensor and filtration:

Pre-filter/ HEPA /UV /Ionizer /Activated Carbon  
Molecular Sieve /Cold Catalyst

**Human body can do self-healing, if given the right conditions**

Indoor air can be 3 to 5 times more polluted than the air outside your house. Outdoor air has only Category 1 of air pollutants, whereas indoor air has all the 3 Categories of air pollutants

We spend more than 85% of our time indoors, exposed to highly polluted air

Poor indoor air quality at home or office causes headache, sinus congestion, cancer, skin diseases, nausea, coughing and sneezing, fatigue and allergies

The air we breathe is rarely pure and generally contaminated with germs, virus and bacteria. It may have bad odour of cigarette, cooking or pets. Even wall paints and wood furniture also release chemicals. And most dangerous, air contains lot of dust. These contaminants make the air unhealthy and put health to a great risk. Human eye can see particles only up-to 35 microns

**WE DEMONSTRATE YOU THE AIR QUALITY PM 2.5 AND NUMBER OF NEGATIVE IONS IN AIR BY OUR INSTRUMENTS**

FEATURES	HA 1	HA 2	Remarks
Voltage	220-240V 50 Hz	220-240V 50 Hz	Low wattage 3 Speeds
Power	48 W	48 W	
No. of speeds	Low/medium/Fast	Low/medium/Fast	
Noise in dB	25/37/58	25/37/58	Can be verified
Area covered	200-350 sq. ft.	450-650 sq. ft.	Wide Coverage
Pre-filter	Provided (Washable)	Provided (Washable)	To block large particles
Anti-bacterial filter layer	Provided	Provided	HEPA blocks up-to 0.3 micron dust particles
Fiber filter type	HEPA	HEPA	
UV sterilization	Provided	Provided	To kill bacteria
Ionizer	Provided (10million pcs/cm <sup>3</sup> )	Provided (10million pcs/cm <sup>3</sup> )	To produce negative ions
Activated Carbon filter	Provided	Provided	To suppress bad smell
Molecular sieve adsorbed	Provided	Provided	Blocks harmful gases
Cold catalyst filter	Provided	Provided	Most of the air purifiers sell on assurance only, not by cross-verification by testing. We prove what we claim by site testing
LED Screen with remote control	Provided	Provided	
Pollution/Filter change indicator	No	Provided	
Timer with sleep mode function	Provided	Provided	
PM 2.5 purification rate	>99.9%	>99.9%	
PM 2.5 purification status display	No	Provided	In India, we breathe at PM2.5 level of 250 to 500 against desired level of below 60 µg / Cu.M.
Intelligent auto adjustment mode	No	Provided	
Price in ₹ *	15000/-	27000/-	

Replacing filters is not an attack on your pocket. Filters cost app. 15% of the cost of equipment\*
